

PIONEER VALLEY CARDIOLOGY

March 3, 2008

Dear Patient:

This month, an exciting level of care will be expanded at Pioneer Valley Cardiology. Lynn M. Bujnevicie, physician assistant, and Terri S. Gardner, nurse practitioner, are set to begin seeing patients with chronic cardiac conditions at our Baystate office at 2 Medical Center Drive, working hand-in-hand with our physicians to provide the best follow-up cardiology care in the region.

Lynn has been with the practice for more than five years, initially working directly with our Cardiac Electrophysiologist, John Marengo, M.D., rounding on our inpatients at Baystate Medical Center, and performing stress tests at our Baystate site. Graduating from Springfield College in 1999, Lynn completed her Physician Assistant Certification in 2001. She was employed at Johnson Memorial Hospital in Stafford Springs, CT as an emergency room physician assistant prior to coming to Pioneer Valley Cardiology.

Terri joined the practice in June 2007, having completed her undergraduate work at Minot State University in Minot, ND and her graduate education at the University of Massachusetts Worcester. In addition, she spent 13 years as a registered nurse and brings a wealth of healthcare experience to her new role as nurse practitioner.

Other midlevel providers currently practicing at Pioneer Valley Cardiology include Nancy D. Logan, physician assistant, who performs stress tests and nuclear stress tests in our Baystate office, and Candace G. McDougall, nurse practitioner, who supports our Mercy office at 299 Carew Street, both in the hospital setting and in the office seeing patients in follow-up. This month, Lisa Singh joined Pioneer Valley Cardiology, coming to us with 12 years experience as a nurse practitioner in a primary care setting.

We are excited to offer you this new level of service and assure you that we will continue to provide the same quality care you have come to expect from our group during its 39-year history. It remains our commitment to deliver the highest possible quality cardiology services to the greater Springfield community.

Sincerely,

Jay Markham, MD, President
